Utah Public Service Commission

Reference: R. Fjelsted Comments On October 2008 Re. QGC Under Billing Case

Subject: Docket No. 07-057-13 and QGC's Attempt To Bill Ratepayers At Large
For Inept QGC Management Decisions

I would like to express my strong support for the position taken by Mr. R. Fjelsted that it would simply be "OUTRAGEOUS" should the Commission decide to agree with the QGC approach of assessing the Ratepayers At Large for technical/management mistakes made in implementing their transponder program that have resulted in such huge underbilling deficits. It is definitely time for QGC to assume and be held responsible for any ventures it takes into new technology/business areas.

As a statement of public policy, the Commission should now declare and position itself as no longer allowing subsidies for QGC's monopolistic ambitions at the expense of "Ratepayers At Large".

Sincerely,

George H. Smith
